🌐 SaiNanduVajhala

Professional Summary

Motivated student currently pursuing studies in Artificial Intelligence and Machine Learning, with a passion for learning emerging technologies. Eager to apply foundational skills gained through coursework and personal projects. Quick to adapt, collaborative, and committed to continuous growth in tech.

Education

Sreyas Institute of Engineering and Technology 2024 – 2027 (Expected)
Pursuing BTech in Artificial Intelligence and Machine Learning
◦ CGPA: 7.2/10

Samskruti College of Engineering and Technology 2021 – 2024
Diploma in Electrical and Electronics Engineering
◦ CGPA: 7.4/10

SR Digi High School 2020 – 2021
Secondary Education
◦ CGPA: 9.8/10

Certifications & Virtual Simulations

- **OCI AI Foundations Associate (2025)** – Oracle University
- **Data Analytics Virtual Simulation Program** – Deloitte (via Forage)

Projects

Real-Time Emotion-Aware Multimodal Voice Assistant with Full-Duplex

- Architected a full-duplex conversational AI system using FastAPI and WebSockets for low-latency, real-time bi-directional audio and video streaming.
- Integrated a vision pipeline (MediaPipe/DeepFace) to analyze user emotion and demographics.
- Implemented Voice Activity Detection (VAD) to allow for natural "barge-in" interruptions, achieving end-to-end response latency under 1.5 seconds.
- Tools Used: Python, FastAPI, WebSockets, OpenAI GPT-4o, Whisper/Deepgram, ElevenLabs TTS

CrewAI Agents for Financial Market

- Developed a multi-agent system using CrewAI for collecting and summarizing real-time US financial market news with a focus on major indices
- Designed a search agent leveraging web APIs to extract latest market news, a summary agent to generate concise insights, a formatting agent to embed relevant financial charts into markdown reports, plus translation and Telegram posting agents.
- Tools Used: Python, CrewAI, Serper API, Groq LLM, YAML

Technologies

Languages: Java, Python, R, C Programming.

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, JetBrains PyCharm, Google Colab.

Databases: MongoDB, MySQL, PostgreSQL.

Frameworks & Libraries: React.js, CrewAI, Express.js, Pandas, FastAPI, NumPy, Matplotlib, TensorFlow.
